ENGINE 0.2.0

SERIALIZATION BW-JCS-NFC-LF-1

READY

APPEND-ONLY HISTORY / FRESH RECOMPUTATION

Audit & Replay

Replay reconstructs the current trusted matter, reevaluates it, regenerates canonical bytes, and recomputes SHA-256. Stored PASS text is never sufficient.

REPLAY STATUS

Pass

CURRENT REPLAY DISPOSITION

Canonical identity reproduced

Close, reopen, fresh evaluation, canonical-byte comparison, and SHA-256 matched.

Replay identity is independent of viewport, orientation, locale, wall clock, and operational timestamps.
