A GROUNDED DI LITTLE GAME

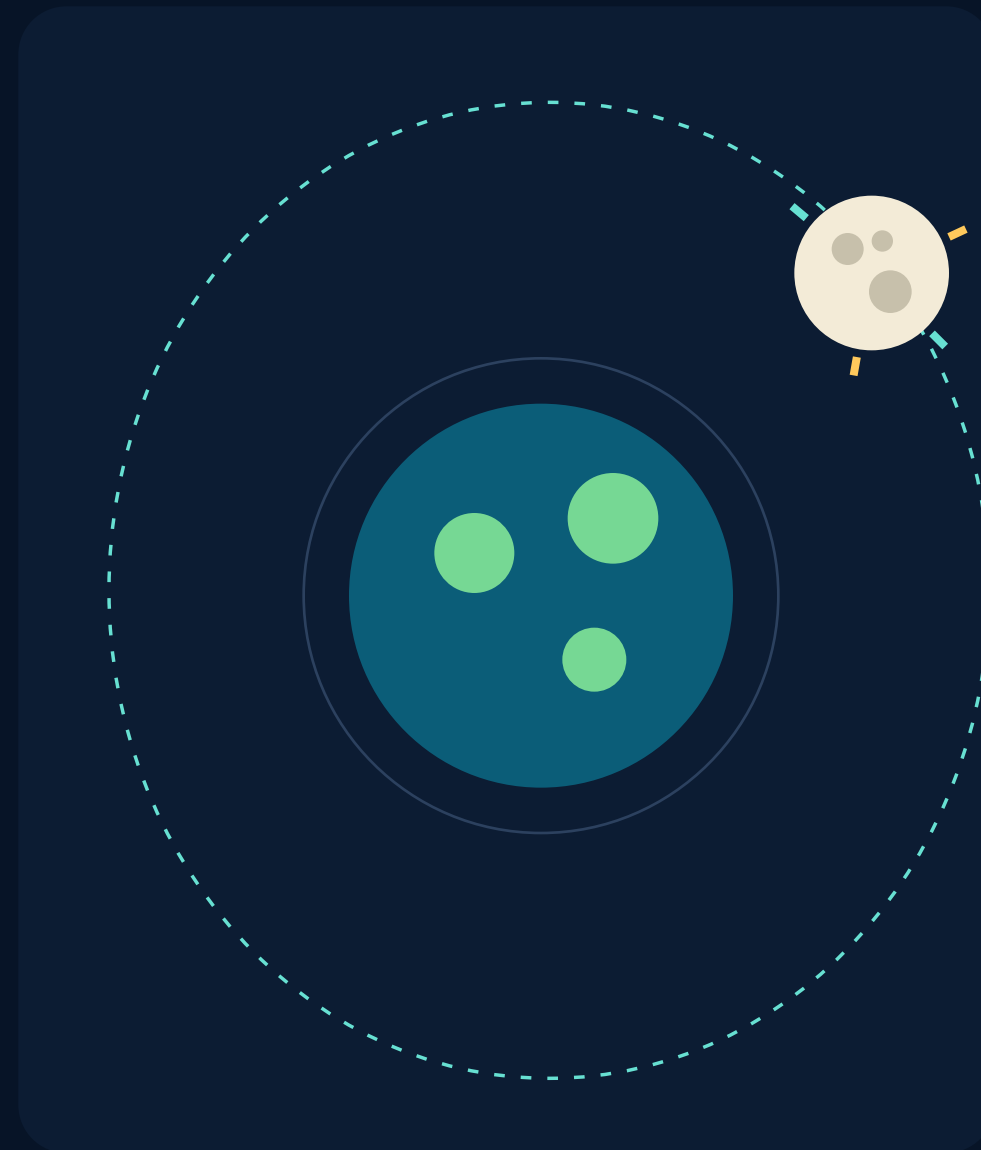

PUT THE MOON BACK

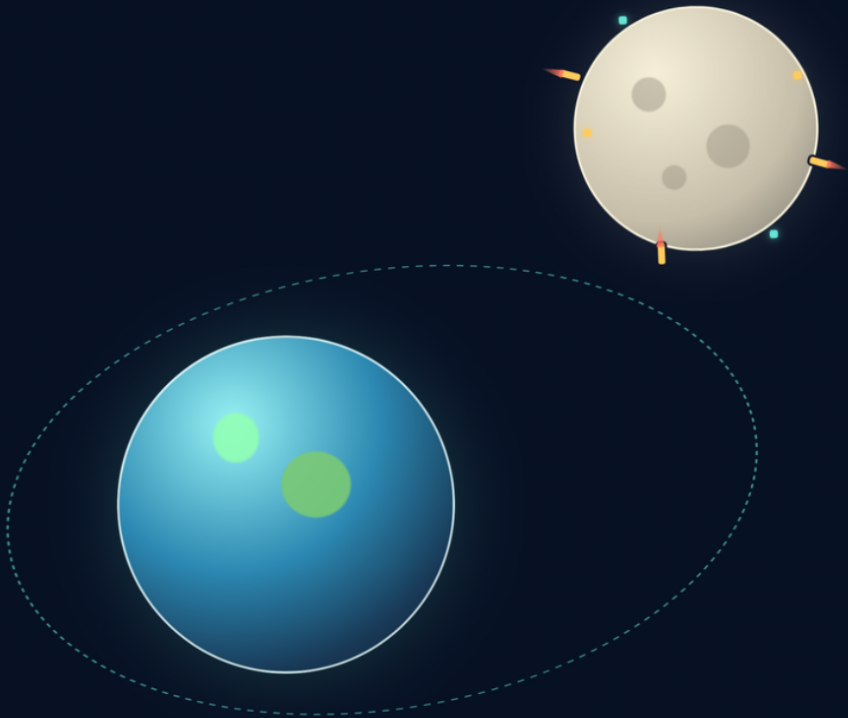

It Was Fine Where It Was.

THE MOON HAS LEFT ITS APPROVED TRAJECTORY.
This seems bad.

HOW TO PLAY

[Replay code](#) · [Settings](#) · [Credits](#)

4 successful returns · 8 stars · 4 souvenirs bolted to history

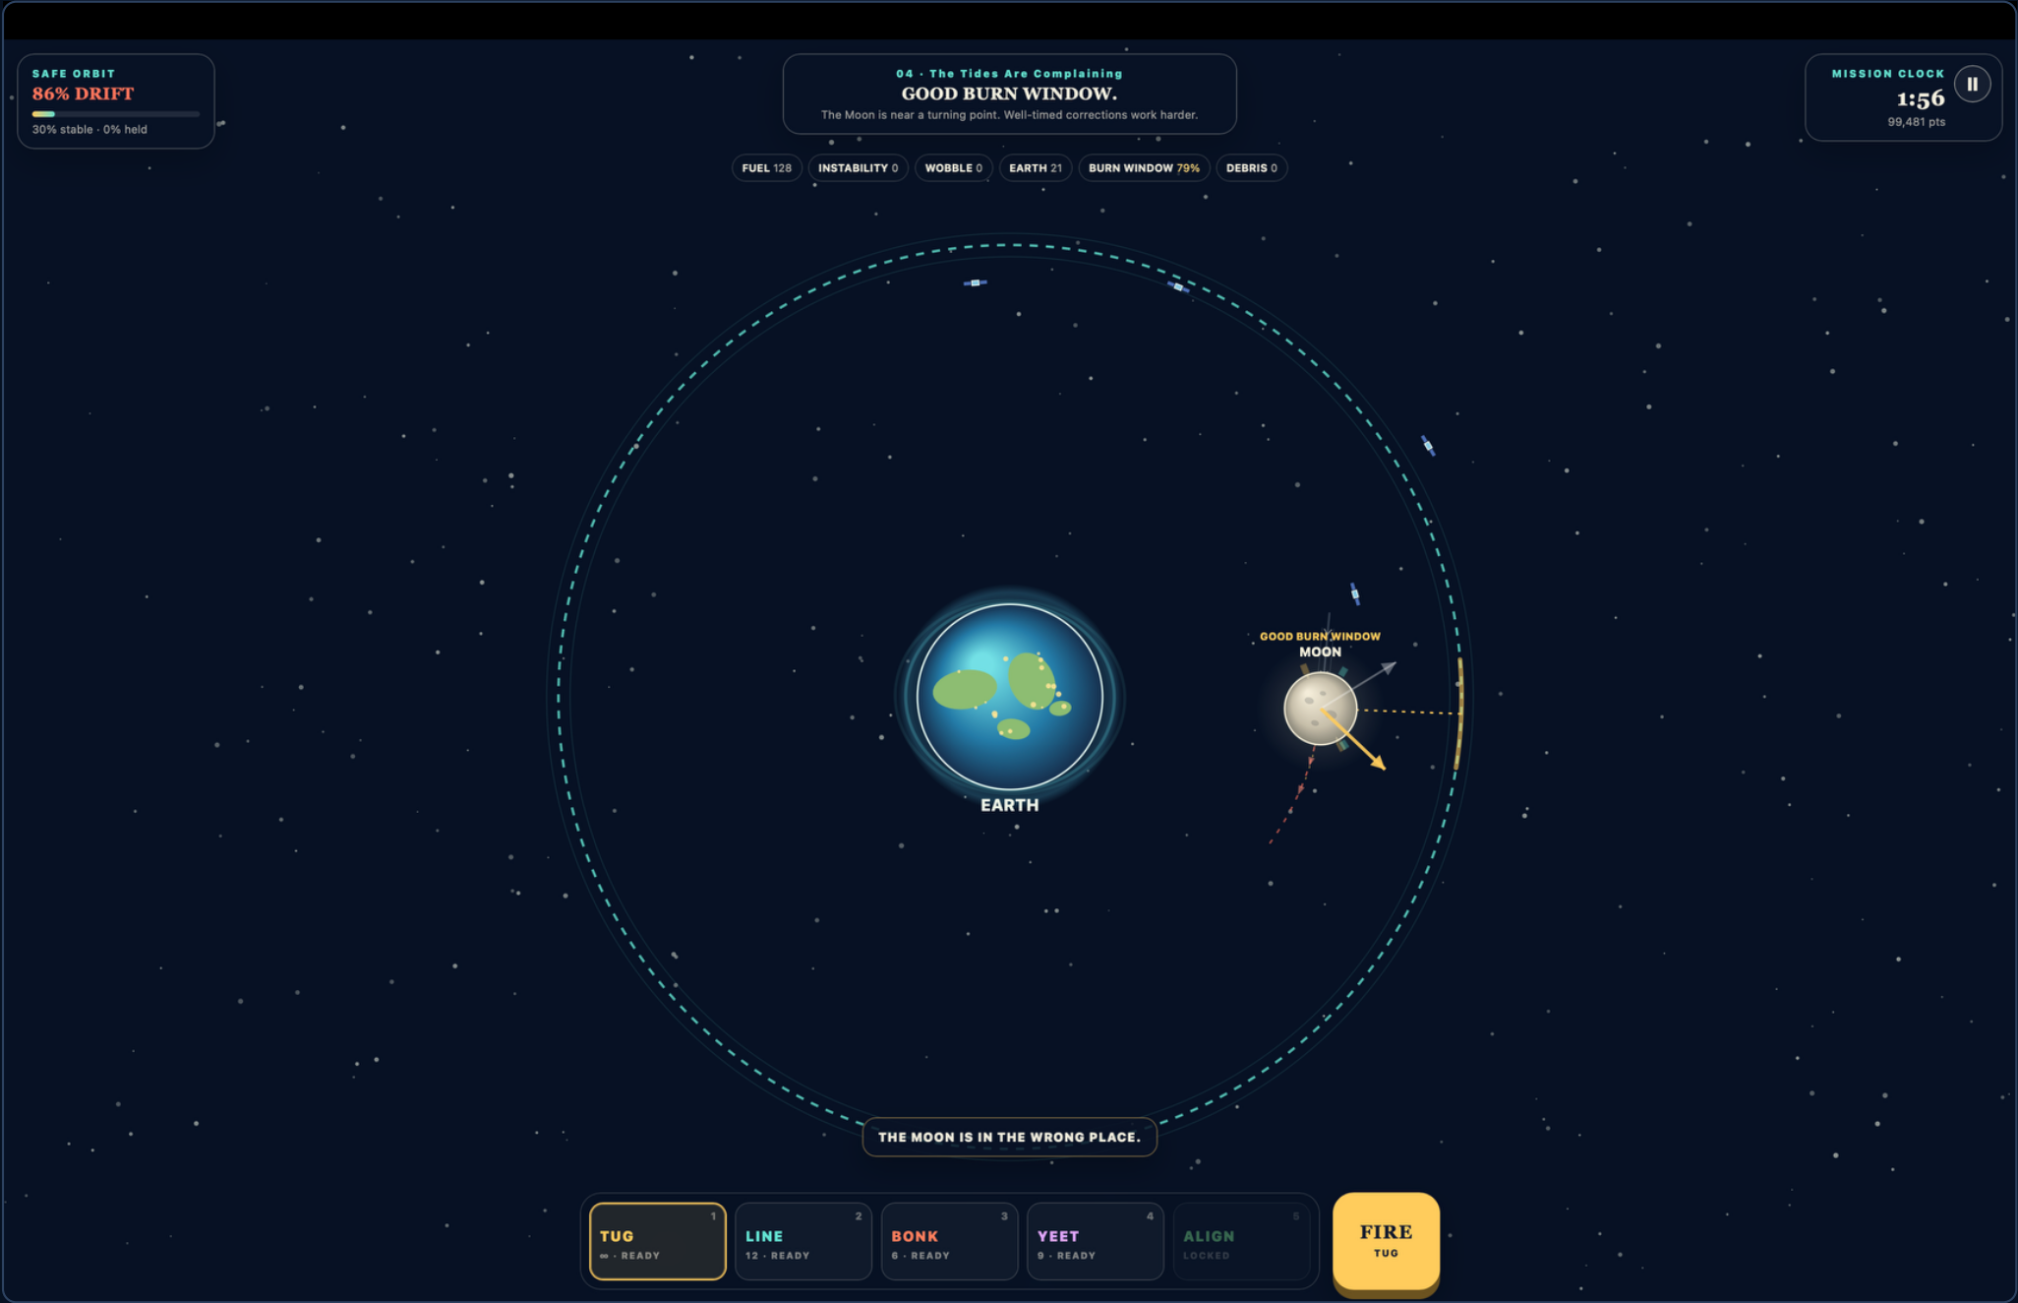

FIRST CONTACT

THE MOON HAS
LEFT ITS
APPROVED
TRAJECTORY.

"The Moon has left its approved trajectory."

GROUNDED DI LLC

PUT THE MOON BACK

CORE GAMEPLAY

THE MOON IS IN THE WRONG PLACE.

Put it back.

GROUNDÉD DI LLC
PUT THE MOON BACK

MISSION CONTROL · 12 AUTHORED PROBLEMS

BACK

Choose a lunar problem.

CHAPTER 1 Correction

CHAPTER 2 Timing

CHAPTER 3 Consequences

01

CHAPTER 1

A Little Nudge

The Moon is low. Please be normal about this.

★★★ · best 144,555

02

CHAPTER 1

Wrong Way First

Sometimes the way back starts in the wrong direction.

★★★ · best 99,037

03

CHAPTER 1

Satellite Soup

Space was apparently already full of things.

★★★ · best 125,442

04

CHAPTER 1

The Tides Are Complaining

Earth has submitted a formal complaint.

☆☆ · best 0

05

CHAPTER 2

The Long Way Home

Good news: it missed Earth. Bad news: it kept going.

LOCKED — return the previous Moon first

06

CHAPTER 2

Full Send

All tools. More debris. One very repeatable mess.

LOCKED — return the previous Moon first

07

CHAPTER 2

The Moon Forgot Sideways

It is falling beautifully straight.

LOCKED — return the previous Moon first

08

CHAPTER 2

Too Much Sideways

The Moon has discovered enthusiasm.

LOCKED — return the previous Moon first

09

CHAPTER 3

Blackout at Apogee

Of course it happened now.

LOCKED — return the previous Moon first

10

CHAPTER 3

Debris Has Entered the Chat

Some of it may accidentally help.

LOCKED — return the previous Moon first

11

CHAPTER 3

Wrong Way, Again

This time the wrong way is outward.

LOCKED — return the previous Moon first

12

CHAPTER 3

Everything, Unfortunately

Final exam. The exam has satellites.

LOCKED — return the previous Moon first

CAMPAIGN

TWELVE LUNAR PROBLEMS.

A campaign built around correcting timing, consequences, and increasingly unreasonable orbit situations.

GROUNDING DI LLC

PUT THE MOON BACK

Put the Moon back.

BACK

1

Look at the mint ring.

That is where the Moon belongs. The dotted path is where it is currently making poor choices.

2

Aim the arrow.

Point where you want the intervention to push. The pale arrow suggests a correction; the colored dotted path previews a fired impulse.

3

Timing matters.

A gold burn-window marker appears near useful turning points. The same push can do more work at the right moment.

4

Hardware has consequences.

Clustering machinery on one side adds wobble. Tethers and the Convergence Array can settle the Moon and repair damaged attachments.

5

Sometimes get worse first.

Controlled-divergence missions deliberately close the direct route. Cross the gold gate, then recover.

6

Space reacts.

Satellites break, debris crosses the orbit, solar weather appears, equipment goes offline, and useful windows open. The same scenario seed produces the same sequence of orbital trouble.

7

Debris can be rude or useful.

Contacts change the Moon's path. Occasionally a collision pushes in exactly the direction you needed. Mission Control will reluctantly acknowledge this.

8

Hold it.

Getting near the ring is not enough. Match the trajectory and sustain stability until Mission Control believes you.

VERY ADVANCED AEROSPACE MANUAL

The screen carries the instructions.
The rule remains simple: put the Moon back.

REPLAYABLE ORBITAL PROBLEMS

Same seed. Same Moon mistake.

BACK

CHALLENGE SEED

MOON-2026-08-08

CRISIS

Orbital Crisis

Generated orbital emergency.
Events, debris, and
sometimes a controlled-
divergence gate.

best 21,000

MINIMUM

Minimum Intervention

The Moon can be saved. The
question is how little you can
touch it.

best 0

PERFECT

Perfect Orbit

A demanding precision return.
High stability and clean timing
matter.

best 0

Offline daily: leave the date seed alone and everyone using that same text gets the same generated problem. No server required.

SEEDED CHALLENGES

SAME SEED. SAME MOON MISTAKE.

Replayable orbital problems with deterministic challenge seeds.

YOUR MOON

IT REMEMBERS WHAT YOU DID TO IT.

A persistent visual history of successful returns, intervention achievements, and lunar souvenirs.

GROUNDÉD DI LLC
PUT THE MOON BACK

PUT THE MOON BACK · V1.4.0-RC.1

It really was fine where it was.

Concept and direction: Grounded DI / MSW

Built as a little orbital game about one extremely misplaced Moon.

Same seed, same crisis. Your decisions are the variable.

The Moon keeps cosmetic souvenirs between missions. Physics does not inherit
your previous bad ideas.
